

AI VISIBILITY AUDIT · LLMS.TXT, DONE FOR YOU

# Find out what AI says about you.

ChatGPT, Gemini, Claude, and Perplexity already answer questions about your business. We audit how they read your site — then write and install your llms.txt file so they get it right.

## WHAT THE AUDIT COVERS

We read your site the way an LLM does — and find every gap between what you offer and what AI thinks you offer.

- How AI sees you today**  
We prompt all four AI engines about your business and capture what they actually say — accurate, outdated, or invisible.
- Crawl & readability check**  
Are GPTBot, ClaudeBot, and PerplexityBot allowed in? We review robots.txt, structure, and how your content reads as plain text.
- llms.txt — built & installed**  
We hand-write a clean, machine-readable map of who you are and your key pages, then place it at your root for AI to read.
- Structured-data & content gaps**  
We flag missing schema and vague copy — the exact spots where AI guesses about you instead of citing you.
- Citation share vs. competitors**  
We see who AI recommends when buyers ask in your category, with a prioritized list to win the answer instead.
